KITE BUILDING REAL AEROPLANE

Springfield Boy Working on Biplane and Expects to Have it Completed Soon

Springfield, August 11.—Springfield residents may be surprised to see within the next few days a real aeroplane, home-made, and constructed in Springfield, sailing birdlike through the sky, describing airy circles in its course through the heavens. The birdman will be Rolland Kite, of 780 South street.

For the last few weeks Mr. Kite has been working on the machine, which is a bi-plane. His workshop is located in the back yard of his home. The aeroplane is now nearing completion and will be given a trial, probably one day this week, on the Country club grounds, where the amateur aviator will be afforded plenty of room. With the exception of a few mechanical features, Mr. Kite personally constructed the aeroplane. The machine is equipped with a costly and high-powered engine, purchased from a Chicago aeroplane concern. That operation of an aeroplane is no easy matter, is fully understood by Mr. Kite, who is anxious to give his machine a trial flight.

AWAY, SUSPENDERS!

That ancient institution known as galluses is doomed. No less an authority than the International Cutters' Association has declared against the old and honorable method of retaining one's trousers that our forefathers discovered to be the most convenient. Suspenders have long been under suspicion as an old-fashioned article. Now they are officially decreed to be out of date. They are not stylish. They take their place with other things that we used to like but rather imagined we shouldn't. Suspenders are detrop. To keep abreast of the times we must take our chances with the belt. Otherwise, we shall be put on record as being old-fashioned. A belt has certain elements of risk, but we can afford to take the chances if we would conform to sartorial usages of the new school.

The tailors have ruled it in annual convention assembled, but they have found a problem. They have found a way to wear trousers without suspenders, with a belt as a merely ornamental and not uncomfortable element in man's attire, and with the safety factor perfect. The new scheme applies to fat men and to very thin men, the men who have either too much waist or not enough. It is a way of wearing a girdle, of cloth, and of attaching one's trousers to it by the sound old method of buttons. This happy device, exhibited at the tailors' convention at Cedar Point the other day, and greeted with enthusiasm by the men who model man's styles, removes the last barrier between the world of men and a supererogatory age. Man's cup of happiness may be regarded as full.—Cleveland Plain Dealer.

J. Y. B. WOOD DIES

J. Y. B. Wood, the singing evangelist, who assisted Rev. Francis Toms in a revival meeting at the Christian church at Monett some time ago, died at a hospital in Oskaloosa, Iowa, Friday night, August 11. Mr. Wood, in addition to his work as a singer in evangelistic meetings, was an artist and gave interesting chalk talks. He was employed at the Menace office at Aurora as cartoonist. He also did some creditable literary work.

He went to Texas last June and spent June and July near Rice, Tex., in evangelistic work. At the close of the meetings there he went to Aurora and from there to What Cheer, Iowa. He was not well when he left Aurora. Sunday, August 6, he became seriously ill and was sent to the hospital where he died.

Mr. Wood made many friends during his stay at Monett.

THIS IS WHAT SAFETY WORK—“BEING CAREFUL”—MEANS

“And the end is that the workman shall live to enjoy the fruits of his labor; that his mother shall have the comfort of his arm in her age; that his wife shall not be untimely a widow; that his children shall have a father, and that cripples and helpless wrecks who were once strong men shall no longer be a by-product of industry.”

Mrs. Fred Walton and daughter Edna went to Springfield Thursday morning to visit relatives.

By mutual agreement milk cows have been allowed to run at large for several years at this place, which is appreciated by those owning cows, but the privilege is being greatly abused by calves and range cattle being allowed to run at large, and if continued will annoy people until even the milk cows will have to be kept up. Several head of calves and yearlings are running at large in town that belong to farmers living in the country, while if a town cow wanders into the country she is taken up and the owner pays the bill.

A HUMOROUS WRITER

Must Have Brains—Here Is One

A healthy humorist gets off good things even in business letters. Here is a good sample from the pen of James E. Wallace:

While this is unsolicited, I would be glad to have you print my testimonial in your valuable sheet among other testimonials. Will say I had the malaria about two months this winter and tried several kinds of remedies and I never found anything that did the work until I tried Hays' Specific and I must say it does the work, as I find that Hays' Specific and Malaria won't work together.

I expect to keep Hays' Specific in my house. The children won't cry for it, as some say, but I find after they take a few doses they laugh and play because they feel good after taking two or three doses.

James E. Wallace.

Hays' Specific, the great system tonic, is sold and fully guaranteed by the Monett Drug Co.
